

Flush-by / Rod Rigs

TCB DIGITAL RIG MANAGEMENT SYSTEM

Provides a new level of **AUTOMATION** in mobile oilfield equipment. **INTEGRATES** all systems on rig equipment, such as the truck, pump, hydraulics, and safety shutdowns into one interface. Converts this precise data into **REAL TIME**, on site and remote **MONITORING**. Information can be viewed on any **MOBILE DEVICE** as well as be sent **WIRELESSLY** to the customer. Generates **REPORTS**. Allows for **VERSATILITY** on all **SAFETY** shut downs.

- Single or 2 Stage Mast
- Controls, power divider, all tank valves air operated from control panel
- 60,000lb pull capacity
- Stiff or Freestanding telescopic 72' mast
- Conventional Draw works or Hydraulic winch
- Lebus Drum
- Namco gearbox
- Fully equipped
- Engineered to meet API 4F, Fourth Edition and certified to CAODC standards
- Exceeds all safety and engineering standards
- Tri-plex Pumps up to 10000PSI. Various brands, Pressures and Volumes available
- Up to 15000 psi manifold and pop valve with pressure dampener
- 1502 or 602 or Integral line pipe - 2"
- Hydraulic hose reel up to 10000PSI
- 3" or 4" gear pump with variable speed control
- Bowie, roper , T & E or V-power
- Code dangerous goods bumper
- Steel tool boxes or aluminum
- TC 412, TC 407 and TC 406 tanks

Options

- Dog House / Office
- Diesel Genset to power all lighting needs
