

Press Release - Weatherford Enters Agreement With TCB Manufacturing to Provide SilverJack SJ190 Units in India

For Immediate Release

Brooks, Alberta — January 2025 — TCB Manufacturing, parent company of SilverJack Lift Systems, is pleased to announce that Weatherford International has entered into an official agreement to market and resell SilverJack's SJ190 Medium Stroke units in India. This strategic relationship strengthens Weatherford's artificial lift portfolio in the region while expanding SilverJack's rod lift international footprint.

In October 2024, the first two SJ190 Medium Stroke units were sold under the new partnership and successfully delivered to India in January 2025, marking the beginning of a coordinated expansion effort for hydraulic lift solutions in international oil and gas markets.

The agreement positions Weatherford as a partner of SilverJack hydraulic lift technology, supporting operators across India who require reliable, efficient, and field-proven artificial rod lift systems.

About the SilverJack SJ190 Medium Stroke

The SJ190 is designed for:

- High-efficiency hydraulic rod lift pumping
- Increased production in challenging well conditions
- Reduced maintenance requirements compared to conventional pumping units
- Remote optimization and monitoring
- Enhanced performance in deviated or difficult wells

The units' durability and low environmental impact make them a strong fit for operators in India's diverse oilfields.

About TCB Manufacturing / SilverJack Lift Systems

TCB Manufacturing, based in Brooks, Alberta, is a Canadian leader in industrial fabrication, hydraulic lift systems, and engineered equipment for oilfield applications. Its division, SilverJack Lift Systems, designs and builds advanced hydraulic artificial lift units deployed across North America and internationally.
